1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest individually or in combination a method for automatically gathering information about a system at a time when a user logs on to the system. The collected information includes: whether the system is configured for high availability (i.e., if two or more systems are available to perform the same jobs, either in a cluster configuration or a primary/backup configuration – see the definition on page 9 of the specification); if any of the application instances that are running in the system is configured for high availability; and if the system is a node of a cluster of systems. The collected information is then displayed to the user.

2. Pursuant to MPEP 606.01, the title has been changed to read:

-- ADMINISTRATION TOOL FOR GATHERING INFORMATION ABOUT SYSTEMS AND APPLICATIONS INCLUDING THE FEATURE OF HIGH AVAILABILITY --.
